Telkomsel Obtained Spectrum in 2.3 GHz Frequency

Jakarta, October 23, 2017, The Government of Indonesia through Ministry of Communication and Information (MOCI) has officially announced that Telkomsel was the winner of the auction process on the 30 MHz spectrum in 2.3 Ghz. Telkomsel placed its highest bid of Rp 1.01 Trillion. With the additional spectrum, Telkomsel's current spectrum holding is as follows: 30 MHz bandwidth in 2.3 GHz Frequency, 15 MHz in 2.1 GHz, 22.5 Mhz in 1.8 GHz, 7.5 MHz in 900MHz, and 7.5 MHz in 800MHz.

The 2.3 GHz spectrum will initially be utilized to increase Telkomsel's service capacity especially in major cities where demand for mobile broadband is relatively higher. This is inline with our effort to enhance customer experience.

Currently, Telkomsel has strong position in the telecommunication industry in Indonesia as a result of continuous investment particularly in infrastructure development, supported by TelkomGroup. We expect that additional spectrum could help improve efficiency in capital and operational expenditure as well as provide bigger business opportunities in the future.
